

CREATE IBM WATSON IOT PLATFORM AND DEVICE

AIM:

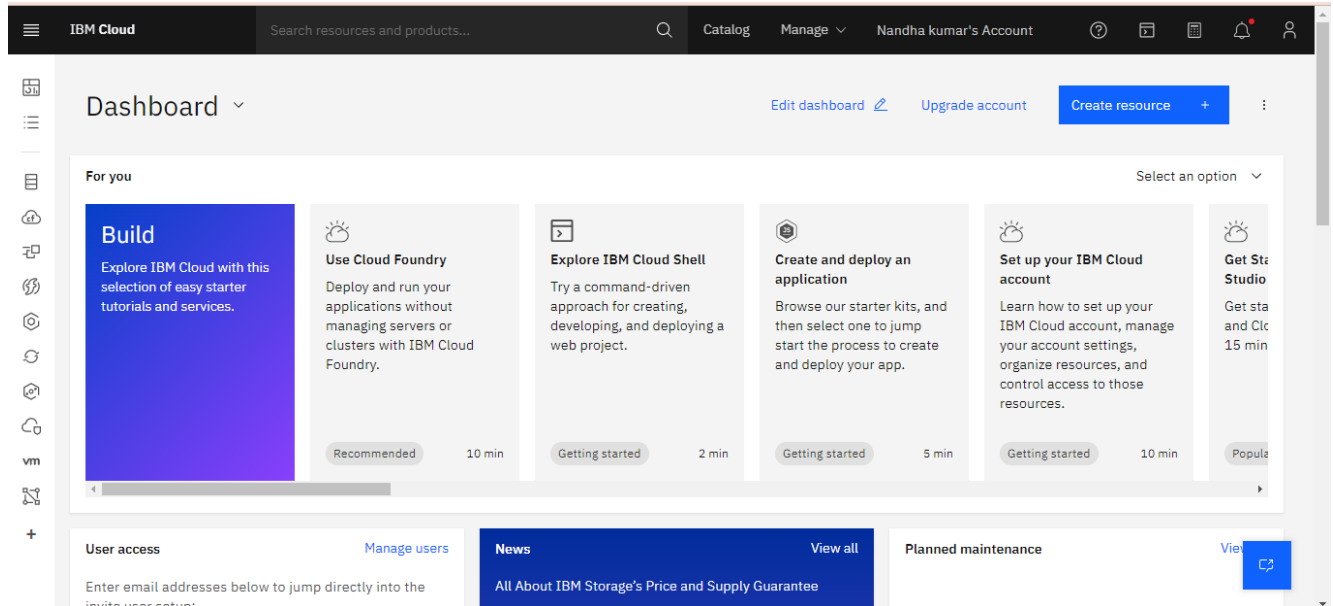

To create the IBM Watson IoT platform and device

STEPS:

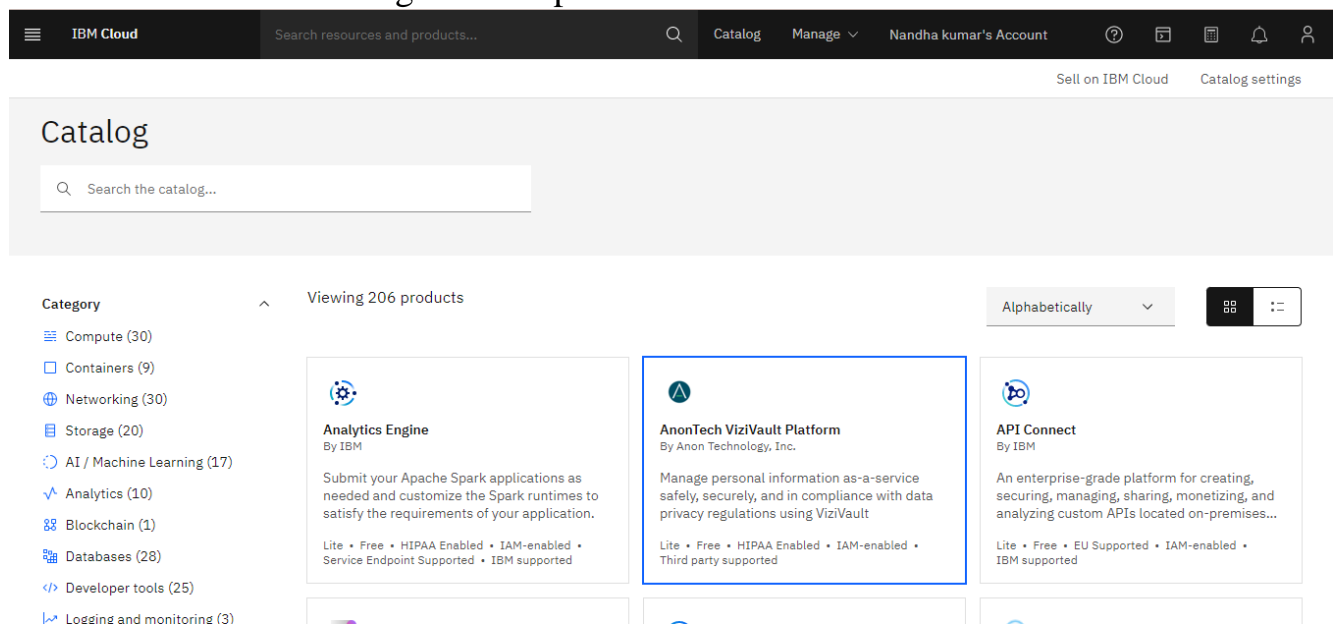

1. Firstly create an IBM cloud account with IBMid and password

2. Home page of IBM cloud

3. Click on the catalog on the top

4. Click on IoT in the category mentioned

IBM Cloud

Search resources and products...

7. Internet of Things Platform Child_safety will be created, where there are different options like manage, plan, and connection (manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other servies)

The screenshot shows the IBM Cloud IoT Platform console. The top navigation bar includes the IBM Cloud logo, a search bar, and links to Catalog, Manage, and the user's account (Nandha kumar's Account). The main header displays 'Resource list / Internet of Things Platform-zf' with a green 'Active' status and an 'Add tags' link. A sidebar on the left contains 'Manage', 'Plan', and 'Connections' tabs. The 'Manage' tab is selected, showing a large blue icon of a device with connected lines. To the right, a section titled 'Let's get started with IBM Watson IoT Platform' provides a brief description and 'Launch' and 'Docs' buttons. Below this, a 'Ready for the next level?' section shows the 'IBM Watson IoT Platform Journey' with three stages: 'Lite' (checked), 'Non-Production', and 'Production'.

The screenshot shows the IBM Cloud IoT Platform console with the 'Plan' tab selected for 'Internet of Things Platform-child_safety'. The 'Current plan' is 'Lite'. The 'Current usage' is 'N/A'. The 'Features' section lists: 'Includes up to 500 registered devices, and a maximum of 200 MB of each data metric', 'Maximum of 500 registered devices', 'Maximum of 500 application bindings', and 'Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed'. The 'Change pricing plan' section shows a table with the 'Lite' plan and its features.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

8. Clicking on the launch button in the manage tab, it will open to this

9. Enter the details to sign in to the Watson Cloud to create a device

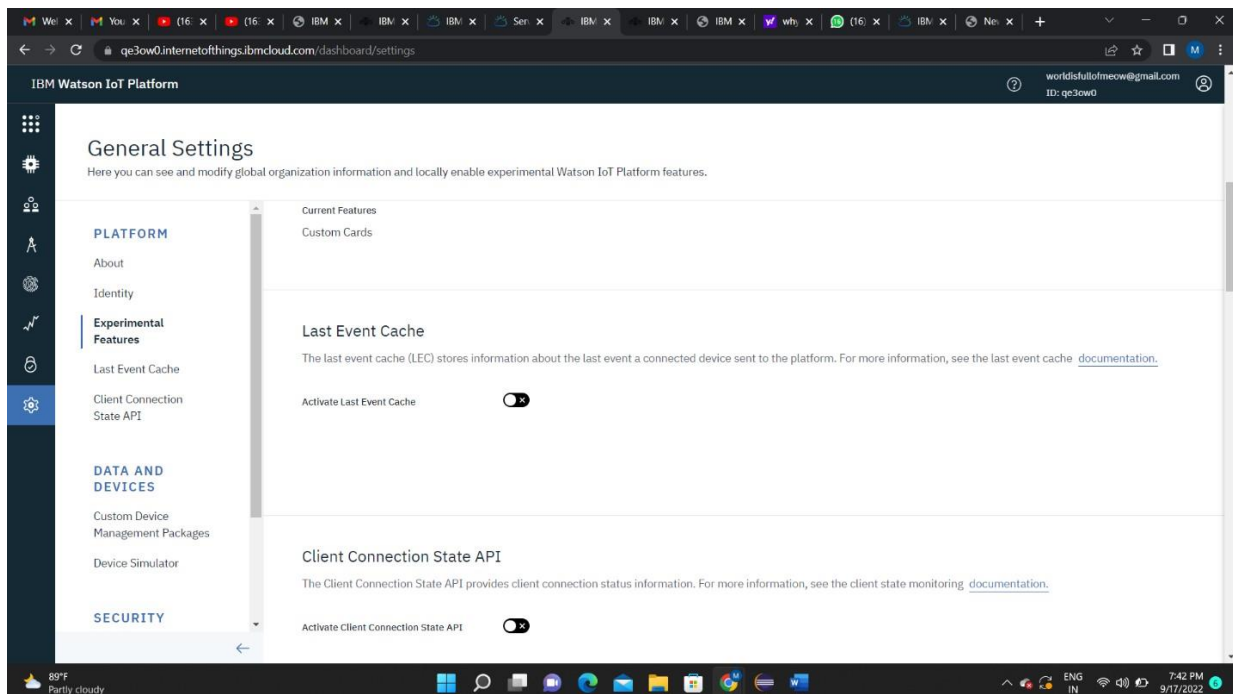

10. Once logged in the name will be displayed and it goes back to the first page

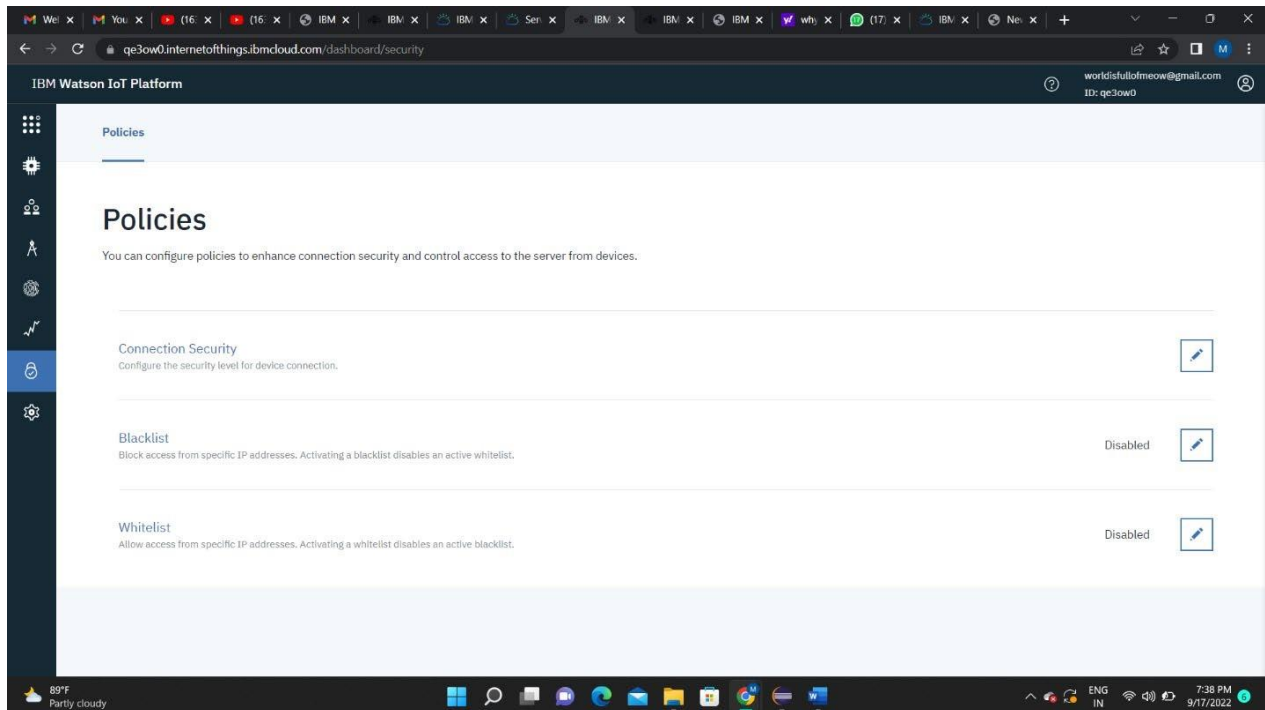

11. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices.

12. The setting tab is used to change the general setting if needed for the project.

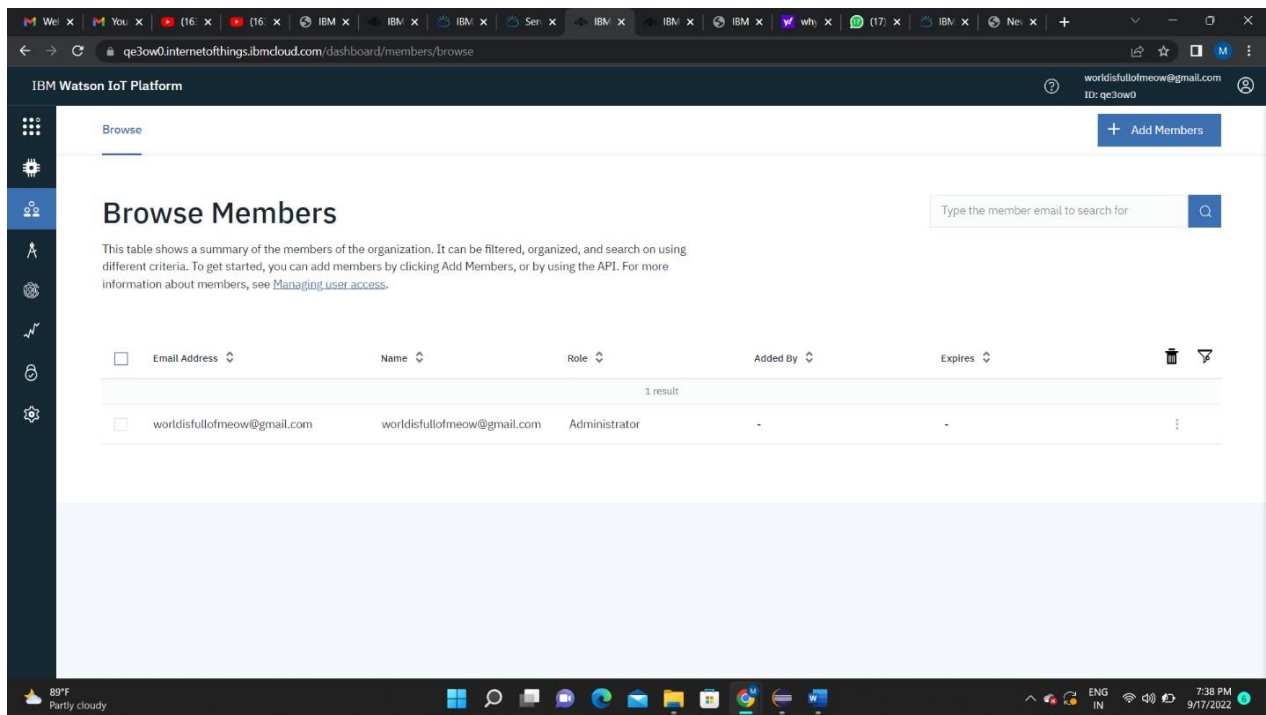

13. In the security tab we can choose the type of security connection and can change according to specification

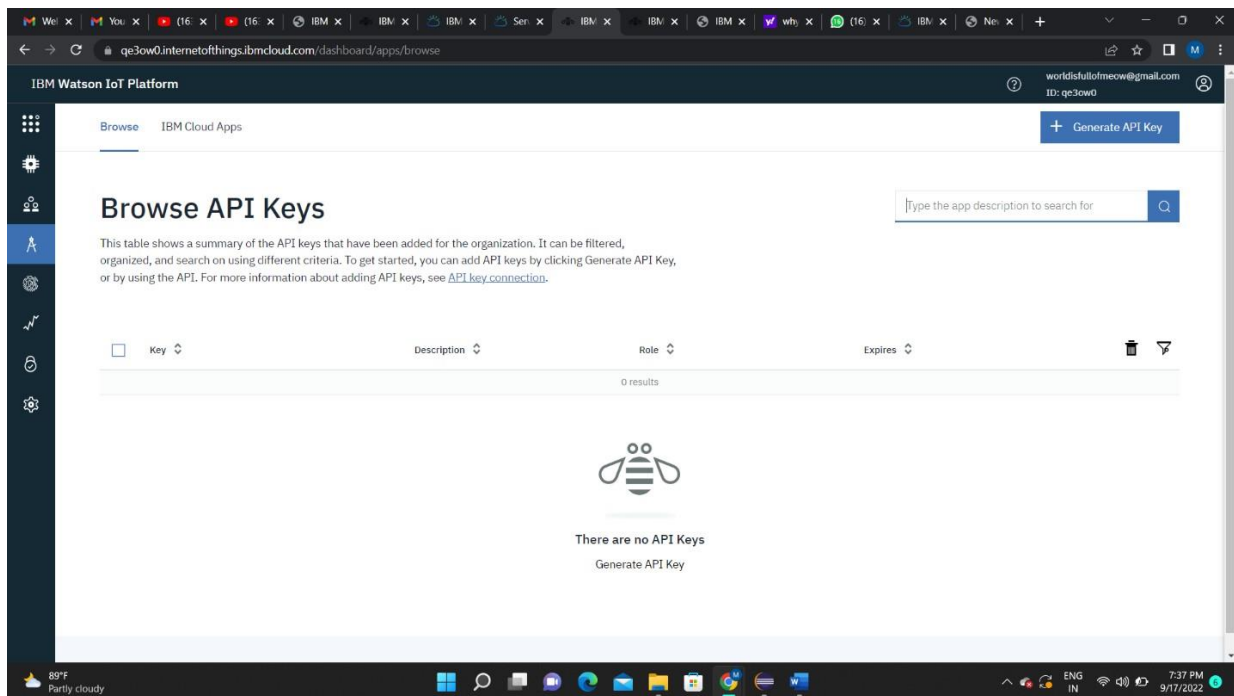

14. Usage gives the summary of how many bytes are used between the devices and the IBM cloud.

15. The member tab is add the teams members to work in the platform

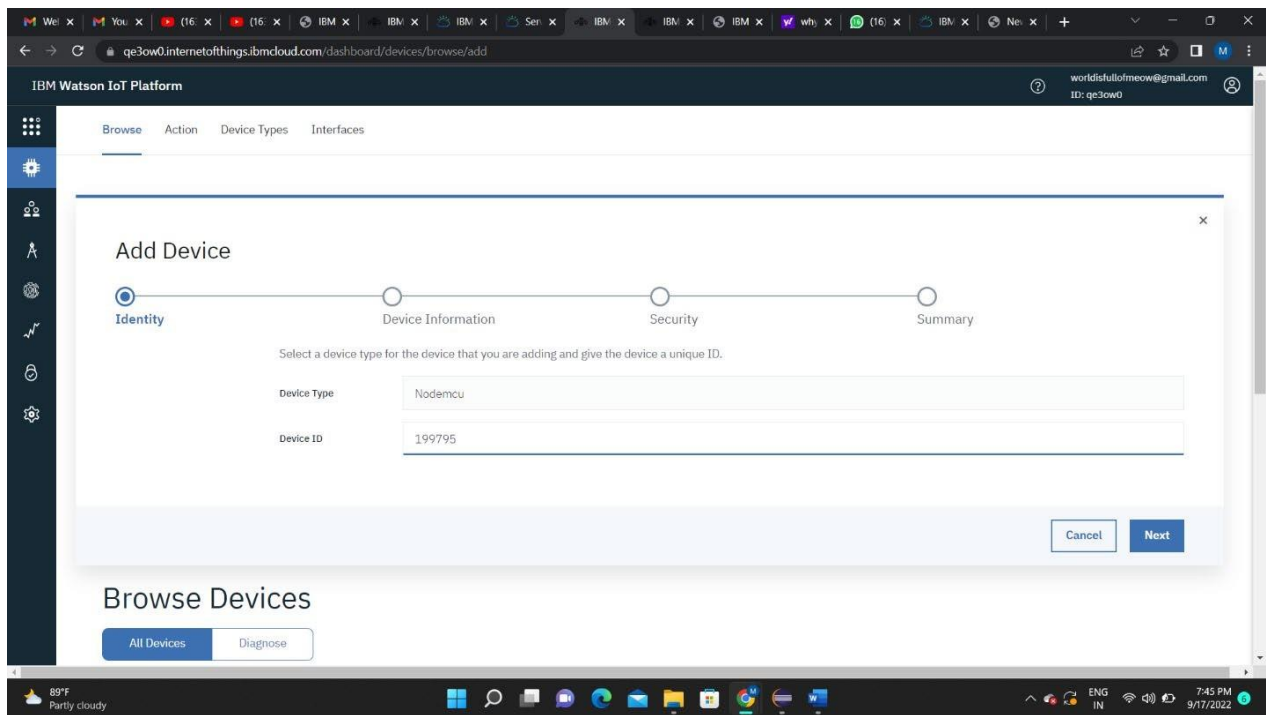

16. This tab is used when you want to connect to some other platform and to integrate with other services.

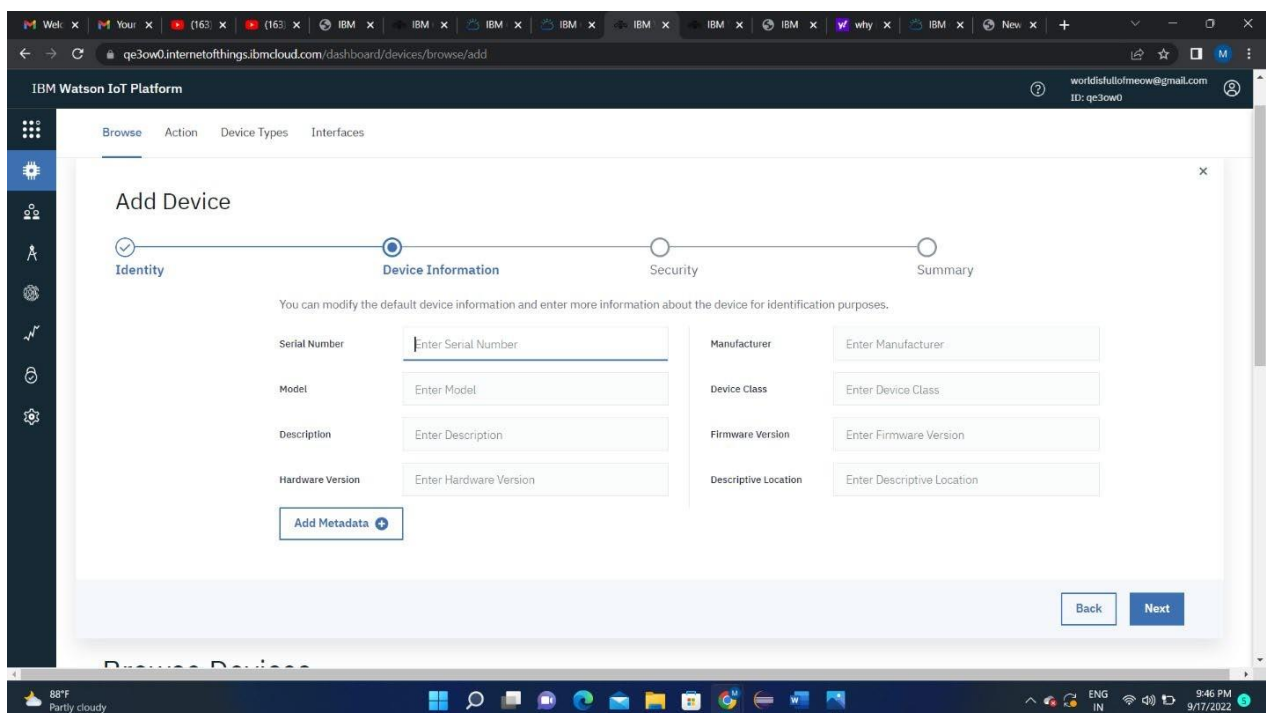

17. Click on the device tab and click on the add device button, then give the device type and device id and click next

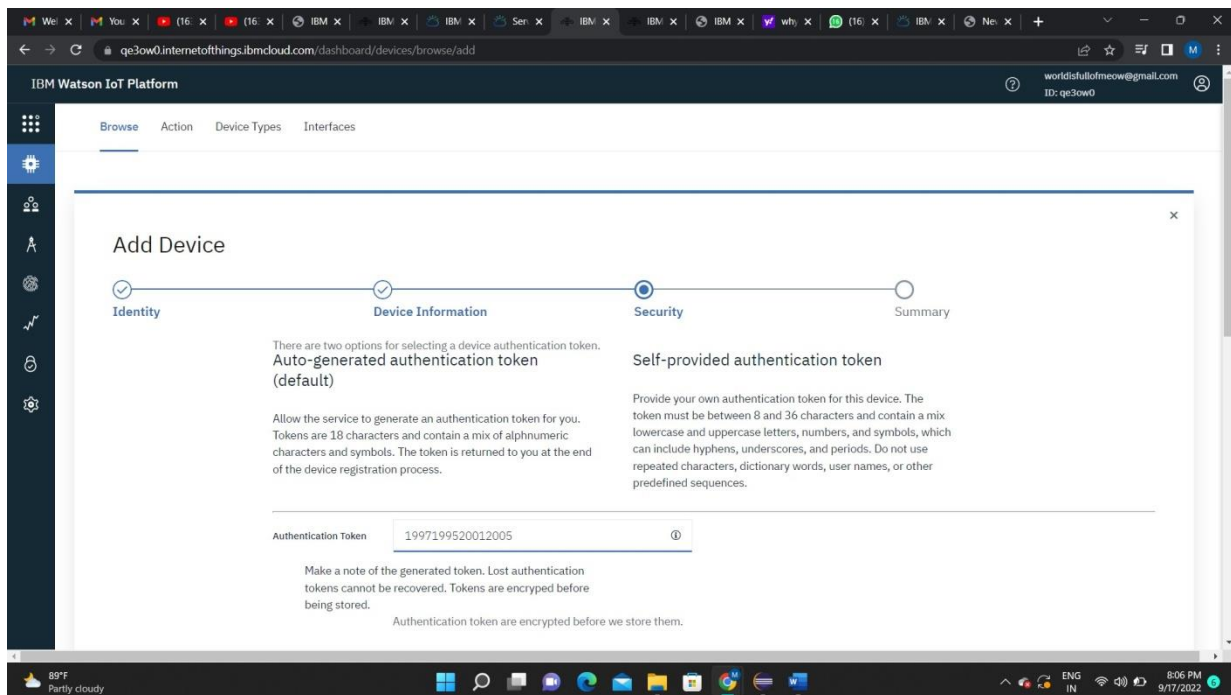

18. This page to enter extra details and of the hardware

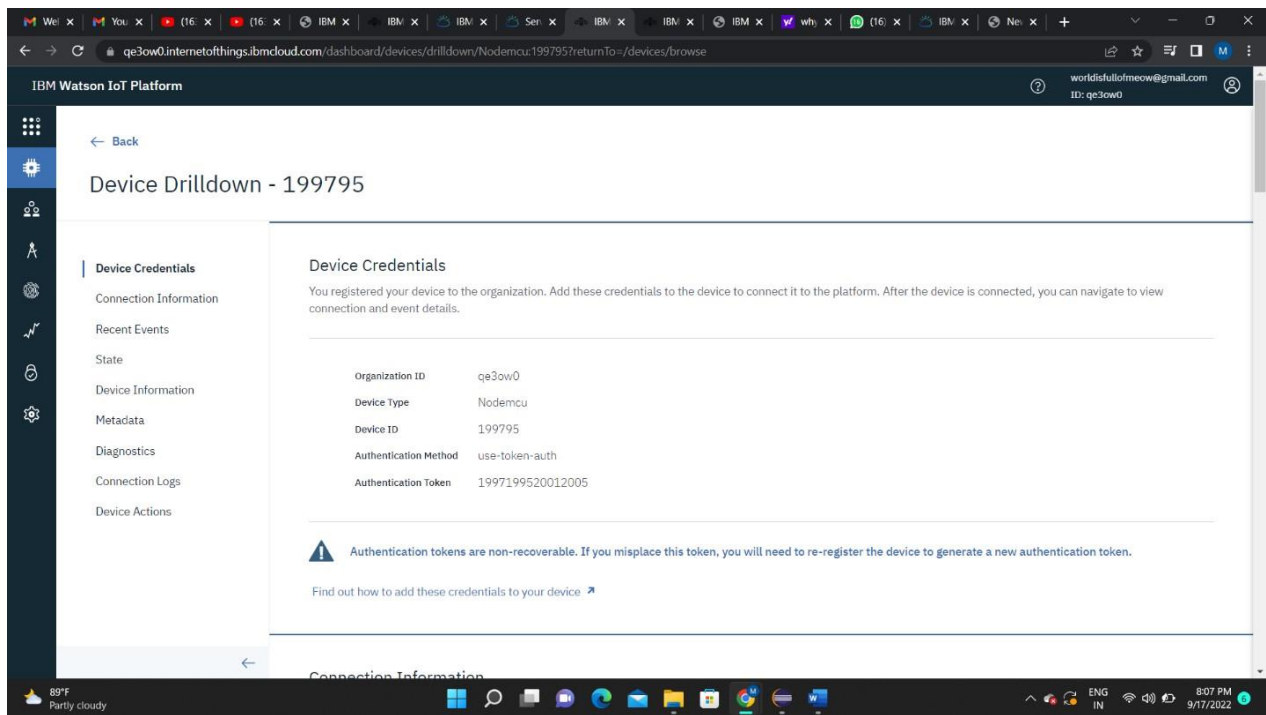

19. Clicking next it goes to the security where we do authentication token id.

20. Clicking on next it goes to the summary of the device then click finish

21. The device credentials will be displayed with all the details

22. Save the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

23. Clicking on the device tab we can now see the added device. Clicking on it will display the other details.

It has different tabs like Identity, Device Information, State and login.

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar labeled 'Search by Device ID' is present. A table lists devices with columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. One device is listed with ID 199795, Status 'Disconnected', and Type 'Nodemcu'. Below the table, a modal window is open for the selected device, showing tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is active, displaying a message: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table with columns: Event, Value, Format, and Last Received. The table is currently empty. The bottom of the screen shows a Windows taskbar with the date and time 8:11 PM on 9/17/2022.

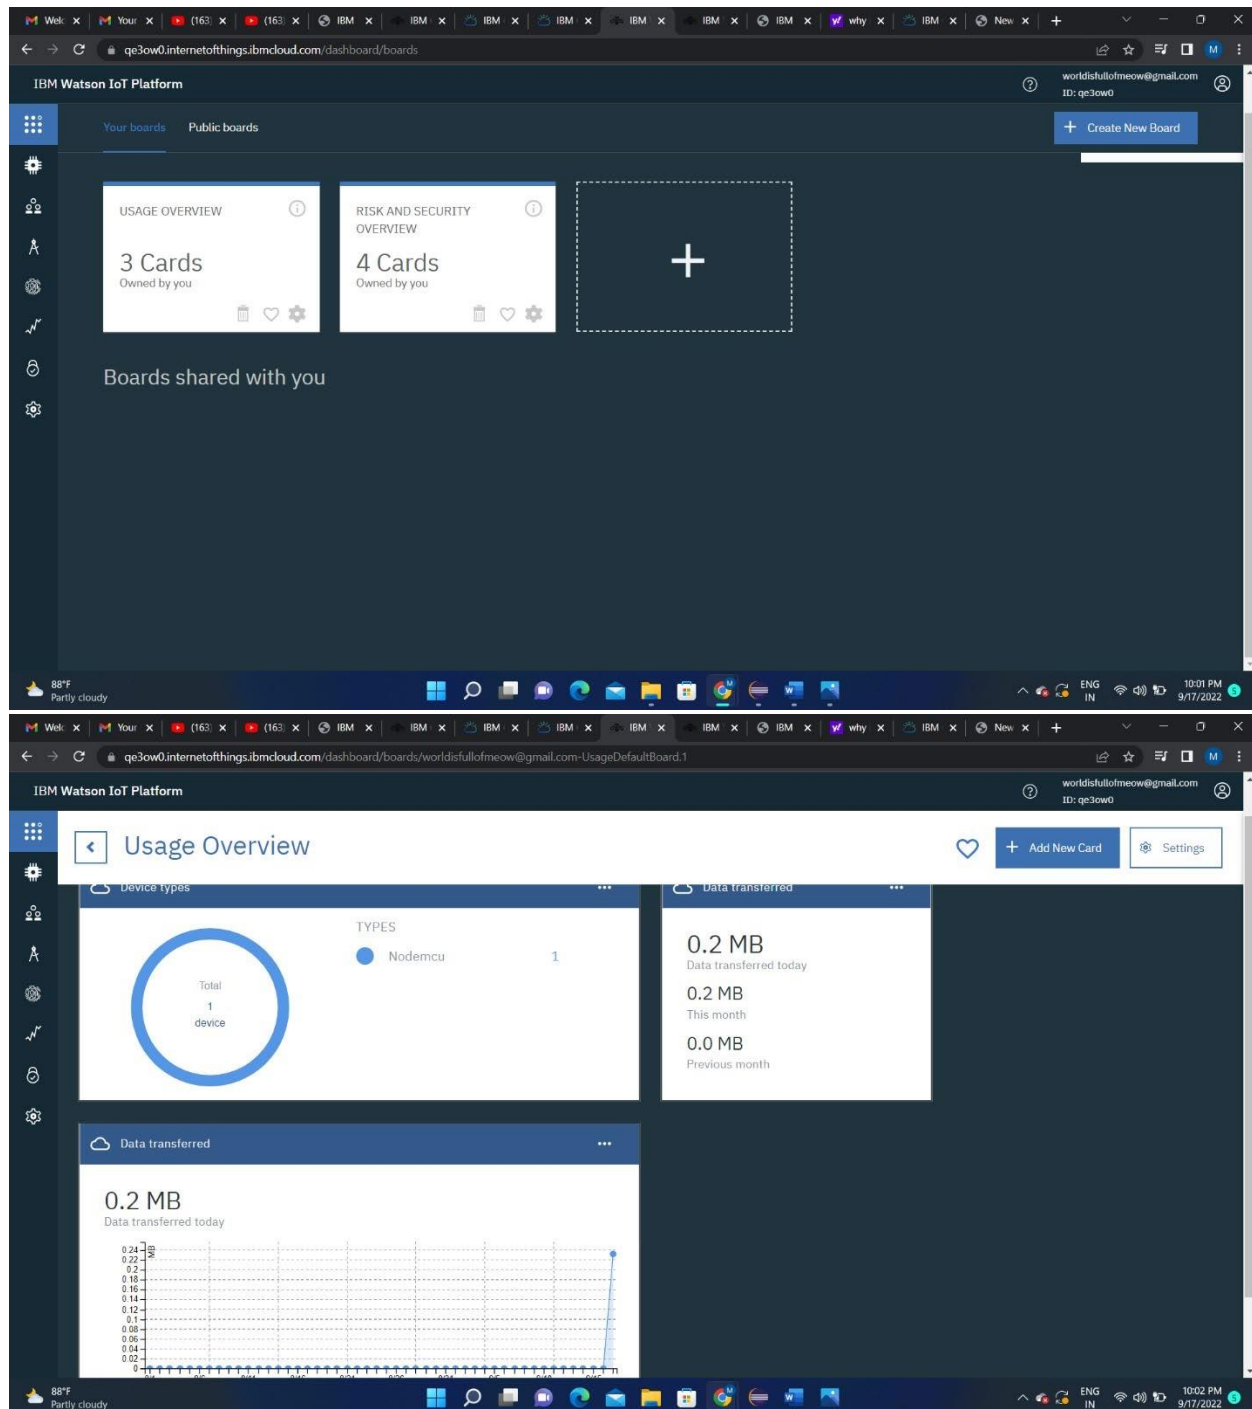

The screenshot shows the IBM Watson IoT Platform dashboard, similar to the previous one. The 'Device Information' tab is now active in the modal window. It displays the following details for the device with ID 199795:

Device ID	199795
Device Type	Nodemcu
Date Added	17 Sep 2022 20:07
Added By	worldisfulofmeow@gmail.com
Connection Status	Disconnected

At the bottom of the modal, it shows 'Items per page: 50' and '1 of 1 page'.

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project.

24. The Boards will display card for the project.

RESULT:

An IBM Watson cloud for IoT and a device is created
